Translation - Theories, Elements, Types, Principles ... The resulting translation is known as the Septuagint, a name that alludes to the History of Asian theory There is a separate tradition of translation in South Asia and East Asia (primarily modern India and China), especially connected with the rendering of religious texts — particularly Buddhist texts — and with the governance of the Chinese empire. Post-colonial Translation: Theory and practice Post-colonial Translation This outstanding collection brings together eminent contributors to examine some crucial interconnections between post-colonial theory and translation studies. As English becomes an increasingly global language, so more people become multilingual and translation becomes a crucial communicative activity. A short history of translation through the ages Yan Fu, a Chinese scholar and translator, developed in 1898 his three-facet theory of translation: faithfulness, i.e. be true to the original in spirit; expressiveness, i.e. be accessible to the target reader; and elegance, i.e. be in the language the target reader accepts as being educated.
