Chemistry practice problems - b Bruner Molarity, or molar concentration, represents the concentration of a solute in a solution. The unit usually used for molarity in chemistry is mol/L and is represented by the symbol M. Molarity is calculated by determining the number of liters of a solution, determining the number of moles of solute in a solution, and then dividing the number moles of solute by the liters of solution. <https://stemsheets.com/science/molarity-worksheet> Chemistry 12 Website Mr. Colgur - SSS Chemistry - D Colgur This site has many resources that are useful for students and teachers of Chemistry 12 in BC as well as any senior high school Grade 12 chemistry course Canada, the US, or anywhere else in the world.
