This includes questions of being, becoming, existence, and reality. The word "metaphysics" comes from the Greek words that literally mean "beyond nature". "Nature" in this sense refers to the nature of a thing, such as its cause and purpose. Philosophy of physics - Wikipedia Some theories, most notably special and general relativity, suggest that suitable geometries of spacetime, or certain types of motion in space, may allow time travel into the past and future. Concepts that aid such understanding include the closed timelike curve.. Albert Einstein's special theory of relativity (and, by extension, the general theory) predicts time dilation that could be ...
